

# DATA SHEET

Product: **Digital Terrain Models**

Region: **Great Britain**

Bluesky is a market leader in the capture, production, exploitation, and delivery of geospatial datasets and services that have rapidly become critical tools in tackling the challenges of the modern world. Operating globally, Bluesky has offices in the UK, US, Ireland and India.

As a recognised specialist in the acquisition and processing of aerial photography and LiDAR, Bluesky uses the latest technology and an experienced technical team to produce innovative off-the-shelf and tailored products to meet the needs of organisations in a range of market sectors.

Bluesky's terrain datasets and 3D models support the acceleration and adoption of 3D applications and technologies in an age of smart cities, digital twins and virtual/augmented reality.

## Key Features

- 2 year rolling flying programme ensures data is current
- Provides detailed measurements of the height of the ground
- Measurements exclude surface features such as buildings and vegetation
- National coverage across Great Britain
- Available as part of our flexible subscription service for quick and cost effective access

## Applications & Industries

- Engineering earth works
- Flood mapping and modelling
- Insurance and risk assessment
- Landscape visualisation
- Volumetrics

## Specification

<b>Resolution</b>	5m
<b>Coverage</b>	England, Wales and Scotland
<b>Accuracy XY</b>	$\pm 1\text{m rmse}$
<b>Accuracy Z</b>	$\pm 1\text{m rmse}$
<b>Formats</b>	Include: ASCII Grid, ASCII XYZ, DXF Point, DWG, GeoTiff
<b>Standard Projection</b>	British National Grid
<b>Tile Size</b>	1km x 1km (200 x 200 pixels)
<b>Metadata</b>	Gemini 2.3

At the time of publication all of the specifications were correct but are subject to change.
